

Question	Answer
1	<p>Area is the amount of space inside a two-dimensional shape. It can be measured in units such as cm² or m²</p> <p>Perimeter is the distance around a two-dimensional shape. It can be measured in units such as cm or m.</p>
2	<p>a) perimeter = 20 cm area = 24 cm²</p> <p>b) perimeter = 20 cm area = 16 cm²</p>
3	<p>a)</p> <div><p>area = 32 cm² perimeter = 24 cm</p></div> <p>b)</p> <div><p>area = 96 cm² perimeter = 40 cm</p></div> <p>c)</p> <div><p>area = 81 m² perimeter = 36 m</p></div> <p>d)</p> <div><p>area = 112 cm² perimeter = 46 cm</p></div>
4	<p>a) area = 30 cm² perimeter = 22 cm</p> <p>b) area = 29 cm² perimeter = 22 cm</p> <p>The shapes have the same perimeter but different area.</p>

Question	Answer
5	<p>multiple possible answers, e.g.</p>  <p>Draw a rectangle and then remove a square from the corner. The perimeter will stay the same, but the area will be smaller.</p>
6	 <p>The lengths of the sides of shape B are very close together.</p>
7	<p>a) multiple possible answers, e.g.</p>  <p>b) 156 m² c) 24 m² (similar shape to shape A in answer for question 6)</p>
