

Big Maths is a teaching programme we have implemented at Newquay Primary Academy to ensure children have a solid foundation of Basic Skills. Problem solving and word problems cannot be confidently attempted until children can manipulate and understand how numbers work.

Big Maths is taught through daily 'CLIC'. This stands for 'Counting', 'Learn Its', 'It's Nothing New' and 'Calculation'. Sessions last for approximately 20 minutes to focus solely on these skills in a fun and engaging way. They are taught in addition to the maths hour.

Once a week the children complete a CLIC challenge which covers the steps that have been learnt during that week. This allows us to identify any learning gaps. As a result, your child may receive an additional piece of maths to complete at home to help address this gap.

Please don't be alarmed if your child has a learning gap. It is normal for everyone to have a gap in their learning and it is through reinforcement at home and at school that will help everyone to make small steps of progress in their learning.

Please see me or your child's class teacher if you have any questions.

Many thanks,

Emily Cowell
