

$$100 - 32 = 68$$

so

$$1 \text{ m} - 32 \text{ cm} = 68 \text{ cm}$$

$$2 \text{ m} - 32 \text{ cm} = 1 \text{ m } 68 \text{ cm}$$

$$3 \text{ m} - 32 \text{ cm} = 2 \text{ m } 68 \text{ cm}$$

# True

We can use bonds to 100 to help us subtract lengths.

$$1 \text{ m} - 32 \text{ cm} = 68 \text{ cm}$$

$$2 \text{ m} - 32 \text{ cm} = 1 \text{ m } 68 \text{ cm}$$

$$3 \text{ m} - 32 \text{ cm} = 2 \text{ m } 68 \text{ cm}$$
