

Divide 2-digit numbers by  
1-digit numbers - no exchange

$84 \div 2$  is equal to  $8 \div 2 + 4 \div 2$

Divide 2-digit numbers by  
1-digit numbers - no exchange

# False

The calculations are not the same.

84 can be partitioned into 80 and 4 not 8 and 4

$84 \div 2$  is equal to  $80 \div 2 + 4 \div 2$
