

Question	Answer
1	<p>a) </p> <p>b) <math>8 \text{ tens} \div 4 = 2 \text{ tens}</math>      <math>4 \text{ ones} \div 4 = 1 \text{ one}</math>  <math>84 \div 4 = 21</math></p> <p>c) 21</p>
2	<p>a) 13                      b) 34</p>
3	 <p><math>48 \div 2 = 24</math></p>
4	<p>a) 23                      b) 33</p>
5	<p>a) 31                      32                      33                      b) 41                      42                      43</p> <p>When the number being divided by goes up by the number dividing, the answer goes up by 1</p>
6	<p>Yes                      8 is in both the 2 and 4 times-tables, so 88 can be divided by both 2 and 4                      1 and 8</p>
7	<p>32                      Divide both 60 and 36 by 3 and then add the answers.                      Add the numbers in the jars and then divide by 3</p>
