

The amounts have been ordered from smallest to greatest correctly.

65%      0.69       $\frac{17}{25}$        $\frac{14}{20}$       72%      0.75

# False

$$\frac{17}{25} = 68\% \text{ and } 0.69 = 69\%$$

so it should be

$$65\% \quad \frac{17}{25} \quad 0.69 \quad \frac{14}{20} \quad 72\% \quad 0.75$$
